

Way forward on Energy, Water, Food, and Climate Nexus. Alignment to the SDGs

July 2024

The Cause

Food agriculture accounts for
30% of all global emissions

The Effect

60% of areas that grow wheat
are subject to drought
37% less tomatoes due to
climate change

Food Industry

- Collaboration- Partner with Government e.g Invest in rural infrastructure, agricultural research, technology, Food Science , Nutrition etc??
- Support local agriculture- and incentivize ingredients that are produced regeneratively
- Innovate and design product that are indigenous and sustainable
- Eradication of Food insecurity
- Nutrition education in the community to promote more nutritious food
- Educate within the contextual realities – how to make better choice within this environment
 - Adding lentil to rice
 - How to use canned vegetables
 - How to eat frozen vegetables
 - Planning meals cooking

Power of Collaboration
